

TANKS

Vertex offers a variety of fluid storage tanks to meet your large volume storage needs. Designed with our clients in mind, Vertex offers these tanks in various configurations and offers safe and efficient tank hauling, delivery and setup services.

Fully enclosed, our fluid storage solutions provide clients with additional environmental safety and regulatory security, while also providing clients with the opportunity to reduce heating costs by up to 75%. Set up by our experienced crews, these tanks require less additional lease preparation and are easily placed on our rig mats (when skidded tanks are not an appropriate option).

Vertex also offers fuel tanks, potable water storage tanks and sewage containment tanks.

Equipment

- **Insulated Frac Tanks**
1000 Barrel (BBL) (160 m³)
1250 BBL (200 m³)
- **API 650 Tanks**
750 - 3000 BBL (120 m³ - 480 m³)
