

DRILLING

At Vertex, we understand the challenges of developing a drilling project. This is why our team of skilled professionals work with our clients throughout the drilling process. From site selection to environmental planning, waste management and reclamation/abandonment, Vertex will help you ensure your project stays on schedule.

With an integrated service offering, Vertex has the unique ability to combine accurate gas migration and surface casing vent flow assessments with environmental site assessments, inspections, soil sampling and drilling waste services. Through our versatile suite of services, Vertex streamlines operations and provides cost effective drilling solutions for our clients.

LET VERTEX DELIVER VERSATILE SOLUTIONS WITH EXPERTISE ON YOUR NEXT PROJECT!
