

# NATURAL RESOURCE ASSESSMENT

Vertex has extensive experience in the conventional oil and gas, oil sands and coal mining, in-situ oil sands and pipeline industries. Vertex reclamation professionals, biologists and foresters have a diverse set of skills allowing them to work competently in different services lines we offer for different industries we service; which allows us to provide our clients with responsive and innovative solutions. Vertex has the experience and knowledge to bring together practical and scientific methods that allows clients to achieve their objectives and regulatory commitments in a timely and cost effective manner.

By utilizing our extensive network of offices, we are able to take advantage of local knowledge and familiarity with the terrain so that we can maximize our clients' regulatory compliance and expedite the reclamation process. Vertex's environmental professional work with industry, government, developers and planners to develop restoration and reclamation programs that will ensure the timely and effective completion of your project.
