With local office locations in North Dakota and Saskatchewan, Vertex is capable of responding to releases with the right professional expertise and equipment in a timely manner. Being local and having the ability to mobilize quickly allows us to provide efficient and effective release cleanup, resulting in reduced environmental impacts that save our clients from additional financial liabilities.

Vertex's professional environmental team is experienced in the regulatory reporting process to ensure that compliance is maintained and that the release is dealt with in a safe and effective manner.

Vertex provides a low cost, in-house geophysics offering that focuses release response efforts in areas of need.
