

RENEWABLE ENERGY

With a team dedicated to green energy projects across North America, we have the knowledge and expertise to advance your project while solidifying relationships with federal, municipal and other engaged stakeholders. As Vertex, we offer a versatile suite of services throughout the lifecycle of your project and have experience helping clients in the solar, wind, hydro and other renewable energy sectors.

From land acquisition to environmental and First Nations consultation, to construction and maintenance, Vertex will ensure you meet your development goals. Our team has worked with a number of renewable energy clients, ranging in size from small, independent operations to large multi-national corporations.

LET VERTEX DELIVER VERSATILE SOLUTIONS WITH EXPERTISE ON YOUR NEXT PROJECT!
