

FLUID MANAGEMENT & LOGISTICS

Vertex recognizes that the storage, transportation and delivery of high value fluids is essential to the successful completion of your project. This is why we offer clients total fluid management and logistic services through the innovative and alternative use of leading technology that exceeds current industry regulations and practices in Western Canada. Offering only the highest quality tanks, trucks and equipment, Vertex provides secure, robust and reliable solutions to your fluid management and logistic needs. Our modern, company owned and maintained fleet of fluid haulers and water trucks are capable of hauling virtually any fluid you require to be delivered or removed from your work site.

Utilizing a team of professionals that are dedicated to the sale, storage, transportation, pumping, recovery and disposal of fluids, Vertex provides a comprehensive approach to fluid management that is cost effective, reliable and environmentally friendly.
