

OCCUPATIONAL HYGIENE

Vertex aims to ensure the safety of site owners and workers through occupational hygiene and hazardous material consulting services. Through our proactive approach to dealing with hazardous materials, we can eliminate the possibility of accidental releases or occupational exposures.

Throughout the life of your project, or on a continual basis, our services will assist in the evaluation of health hazards due to occupational exposure to various toxic contaminants. Our professional staff recommend control measures for the protection of workers' health and safety in a cost effective manner so that both client and contractors understand how to properly manage the hazards in their work environment.
