

PRESSURE TRUCKS

Vertex pressure trucks pump various fluids at high pressures into pipes, wellheads and vessels to thoroughly test for leaks. Capable of fluctuating pressures while monitoring flow controls and levels, our pressure trucks are ideal for use in facility turnarounds and can pump fluids at pressures as high as 10,000 psi.

Services

- Pressure Testing
- Methanol Pumping
- Wellhead Testing
- Acid Pumping
- BOP Testing
- Pipeline Testing
- Glycol Pumping
- Hydro Testing
- Fluid Transfers
- Tank Stinging
- Water Disposal
- Hydrate Handling
- Pigging & Batching Pipelines
- Other Pressure Related Work

High pressure cleaning of:

- Tanks
- Heat Exchangers
- Vessels
- Piping
- Aerial Coolers
- Fin Fans
- Scaffolding
