

REGULATORY APPROVALS

With an integrated suite of services, Vertex's land and environmental teams work together to achieve seamless processing of crown applications. By utilizing a single company for your land, regulatory approval and environmental needs with access to a shared database, our clients save time and resources while minimizing the chances of errors.

Vertex maintains local knowledge of regulatory requirements through our team of land and environmental professionals located throughout our large network of offices. This structure enables us to develop long term relationships with regulators which enables us to ensure that our clients maintain regulatory compliance throughout the lifecycles of their projects.
