

RENEWABLE ENERGY

With a team dedicated to renewable energy projects across North America, Vertex has the knowledge and expertise to advance your project while solidifying relationships with federal, municipal and other engaged stakeholders. At Vertex, we offer a versatile suite of services and have extensive experience engaging regulatory bodies to ensure the successful completion of your solar, wind, hydro and other renewable energy project.

Our team has worked on large infrastructure projects of every kind, including renewable energy generation facilities. Our experience, knowledge and efficient processes allow us to execute both small projects and large complex and demanding projects for a diverse client base, all within scope, schedule and budget.
