

SEMI-VAC

Vertex semi-vac units are certified to haul both hazardous and non-hazardous materials and are ideal for projects involving large volumes of waste material. Our semi-vac units are used for fluid transfers, tank cleaning and shipping of waste products, drilling mud and a variety of solids from de-sanding and tank stinging. No matter the product being hauled, these units are the perfect solution to transport large volumes of waste to appropriate disposal facility. At Vertex, our operators utilize these units to effectively and efficiently complete the job while reducing overall transportation costs.
