An essential tool for successful waste management, Vertex's wet / dry vac can remove a variety of materials with different viscosities and densities from tanks, vessels, water treatment ponds, basins, sewers and drains.

From waste removal to product recovery, these trucks are capable of moving both wet and dry product including light dust, powders, bulk solids, liquids and slurries.

Our clients benefit from our experience working on regular cleaning schedules, planned outages / turnarounds and emergency spill situations in a variety of industry specific applications.
