

# NOISE MANAGEMENT

A leading provider of noise reduction and acoustical solutions, Vertex ensures your project will comply with all permissible sound level requirements during regular operation, as well as during any construction and maintenance phases. Whether your requirements for noise abatement apply to industrial, commercial or transportation applications, Vertex has the expertise to ensure the successful project management, design, engineering, manufacturing and installation of various acoustical products.

From diagnostic services to regulatory application guidance and the supply and installation of noise reduction solutions, Vertex has the capabilities to develop and implement a customized noise management strategy to assist clients in meeting applicable regulatory requirements.

## Solutions

### Noise Reduction Solutions

- Acoustic Enclosures & Buildings
- Acoustic Louvers
- Barrier Walls
- Industrial Noise Curtains
- Silencers
- Acoustic Building Skirting
- Exhaust Mufflers
- Acoustic Pipe Lagging
- Ventilation Packages
- Vibration Isolation
- Noise Compliance Guarantees

### Acoustical Engineering Services

- Diagnostic Measurement Programs
- Regulatory Guidance
- Regulatory Compliance
- Design & Implementation of Noise Controls
- Site-wide Balanced Noise Mitigation Strategies
- Construction Noise Mitigation Measures
