

# PRE-ENGINEERED METAL BUILDINGS

Specifically designed for quick installation, Vertex's pre-engineered metal buildings can be built to incorporate a wide array of exterior finishes and architectural features. Our pre-engineered metal buildings are long lasting, require minimum maintenance and can be erected on-site by one of our skilled teams or by one of yours in a quick and efficient manner.

Vertex's pre-engineered buildings can be built to meet any height and span requirements, provided engineered feasibility is maintained.

## Applications

- Warehouse / Distribution
- Welding Shops
- Agricultural
- Industrial
- Oil & Gas
- Storage
- Manufacturing
- Municipal

## Why Choose Pre-Engineered Metal Buildings?

- Steel Construction is Durable
- Up to 50% More Cost Efficient Than Traditional Building Structures
- Energy Efficient
- Weather Resistant
- Sustainability
- Significantly Shorter Construction Time Than Traditional Buildings
- Can Incorporate Large Framed Openings, Suspension Requirements, Overhead Cranes, Vertical Lift Towers & More
