

SILENCERS

Vertex offers high quality silencers to compliment our acoustic buildings and complete a site-wide balanced noise mitigation solution. Our acoustic engineering team will customize your silencer design to suit the application and meet your noise reduction needs. Our silencers can be designed for low pressure loss and high flow rate applications. Silencers can be removable for maintenance operations and can accommodate most duct configurations. We also supply acoustic louvers, ridge vents, and other components related to silenced ventilation systems. Our silencers are used in a number of different industries including oil and gas, power generation, manufacturing, mining and petrochemical.

Silencers

Applications

- Building Ventilation Fans
- Air Cooled Heat Exchangers
- Wet Cooling Towers
- Air Cooled Condensers
- Dust Collectors
- Air Intake & Relief Openings
- Combustion Air Inlets
- ID/FD Fans
- Lube Oil Coolers
- Chillers

Products

- Parallel Baffle Silencers
- Plenum Silencers
- Absorptive Shrouds
- Acoustic Louvers
- Acoustic Ridge Vents
- Low Pressure-loss Silencers
- Lined Ducts
- Lined Weather Hoods
- Elbow Silencers
- Duct Lagging
- Custom Silencer Designs
- Quiet Fans (axial or radial)
- Complete Ventilation Systems
