

POWER SOLUTIONS

Vertex provides a fully integrated service offering to ensure versatile, innovative solutions to suit any electrical power requirement. Our team of highly knowledgeable engineers and manufacturers work together to design, manufacture, install, and combine the traditional elements of electrical power and control systems in a variety of portable building types and designs.

Our diverse portfolio of power services include:

- Electrical Switchgear (Arc Resistant & Metal Clad)
- Integrated E-Houses
- Motor Control Centres
- Structural Steel and Sheet Metal Fabrication
- In House Engineering Team
- Advanced Product Development
- Field Service for Installation
- Testing and Inspection

Product Specifications

Arc Resistant + Metal Clad Switchgear:

- 480V-38KV voltage systems
- Designed and Tested to the North American Standards of ANSI/IEEE
- Arc Resistance Types: 2, 2B and 2C

Motor Control Centers:

- Medium Voltage MCC's
- Flexible Control Formats
- Meets CSA, UL, and NEMA Standards
- Arc Resistant and Non-Arc Resistant Options Available

Electrical Houses & PDC:

- Fully Integrated E-Houses c/w Switchgear/MCC, PLC Power, HVAC, Cable Tray
- PDC Outdoor Rated Skids
- CSA-A660 & CWB Certified
- Detailed 2D and 3D Drawings
