

FIELD SUPERVISION & IN-HOUSE ENGINEERING

At Vertex, we understand the importance of technical expertise, logistical planning skills, and safety recognition required by wellsite supervisors in order to run successful drilling, completion, work-over or abandonment program. Vertex employs a highly qualified, organized and safety-oriented team of certified IRP-7 compliant personnel with experience in all types of drilling projects including shallow, deep, SAGD, unconventional, sour, directional, horizontal, re-entry, coil tubing and under-balanced well programs.

Our goal is to provide you with the most qualified individuals, both in field and in-house, specific to your needs and size of the project. Our engineers and wellsite supervisors are specifically chosen with the experience to meet your needs and are available to work within Canada as well as internationally.
