

# COMMERCIAL SERVICES

Vertex is dedicated to finding cost effective solutions for all of our clients. Commercial services are offered in conjunction with regulatory expertise in service regions across North America. Our team of highly skilled professionals and technical experts efficiently complete projects in urban and industrial settings with a comprehensive understanding of all stakeholders involved.

Vertex provides clients with clear recommendations pertaining to real estate divestiture, sale or acquisition, and lease or finance through detailed site assessments. Our services also provide recommendations on managing chemical and physical hazards in the workplace to help mitigate issues related to health, cost and work interruptions.

By employing a variety of methods and technologies to remediate soil and groundwater contaminants, we have become specialists in remediation and the implementation of risk management strategies. Our team is able to provide technical expertise and versatility to ensure all projects meet the regulatory requirements and project goals set by our clients.
