

HIGH PRESSURE WATER WASHING

By utilizing innovative high pressure water washing systems with pressures ranging from 10,000 to 40,000 psi, with variable flow rates, Vertex has become a leader in the cleaning industry. Vertex uses automated water blasting equipment /tools to remove unwanted deposits from process equipment such as vessels, tanks and piping.

Our operators have a wealth of expertise in the industrial cleaning industry and use this knowledge during turnarounds, outages and maintenance projects to ensure your site and equipment will be cleaned in an efficient manner.
