

WASTE MANAGEMENT & RECYCLING

Vertex provides a single source to meet your oil and gas, commercial, industrial, construction and pipeline waste management and recycling needs. Our waste bin facilities are set up to recycle as much of the waste as possible with cardboard, paper and plastics being baled on-site and then sent to a designated recycling facility. We strive to always provide safe and cost effective solutions, which is why we have designed our waste management bins to be both safe and functional. Our unique bin designs include side doors that allow for proper sorting and completely eliminate the need for any steps or catwalks.

Our comprehensive and in-depth tracking system ensures that all the waste we handle is dealt with in an appropriate manner. For each of our valued clients, we create a customized report that summarizes your waste profile by project with relevant regulatory waste manifests included in these reports as required.
