

HOT OILER

Vertex Hot Oilers are equipped with high efficiency heaters making them safer with quicker warm-up times and higher output capabilities resulting in time and cost savings for our clients.

These units are able to preform clearing and preventative maintenance on wells, pipelines, tanks and various other flow lines that can negatively affect your operation and production capabilities.

Our hot oiler operators come with industry leading experience and safety training, getting one of the most sensitive tasks in the oilfield accomplished safely and efficiently. Utilize Vertex for your next de-waxing, de-scaling and stimulation job!
