

OILSANDS

The development of the oilsands typically garners large stakeholder attention from various organizational bodies and therefore requires companies with expertise in the appropriate regulatory requirements, operation standards and safe work practices. Vertex's professional team ensures the safe and efficient operation of your oilsand SAGD, insitu or mine project through our environmental and industrial service offering.

Throughout the lifecycle of your project, Vertex professionals develop solutions to meet your needs. We understand the challenge of maintaining production while meeting government mandates for environmental protection and help clients maximize uptime efficiency, while ensuring regulatory compliance and minimizing downtime due to cleaning and maintenance activities.

LET VERTEX DELIVER VERSATILE SOLUTIONS WITH EXPERTISE ON YOUR NEXT PROJECT!
